PREFACE

This report lists the order of battle information on all intelligence targets imaged on the photography of this mission. Targets in the New and Change Summary Report showing an order of battle will also be included in this report.

Targets in each of the three sections are arranged 1) by subject, 2) within the subject according to country, 3) within the country by WAC area, and 4) within the WAC area by geographic coordinates in ascending order. The map base used (when available) for the derivation of coordinates is the latest edition of the US Air Target Chart, Series 200.

The header line for each target contains, reading from left to right, the target name, the geographic coordinates, the World Aeronautical Chart number, the Bombing Encyclopedia (BE) number, and the NPIC target number.

The photo reference data line provides the pass number (e.g. 10D), frame/index numbers (e.g. F/4 & A/6 or 4/5), best frame grid (Universal Grid No 1, February 1964), coordinates (e.g. 36-12), limiting conditions (e.g. H), photographic quality (e.g. F), photographic coverage (e.g. T), and the mode (e.g. ST).

The symbols for limiting conditions affecting photography are: C (clear); SC (scattered cloud cover); HC (heavy cloud cover); H (haze); CS (cloud shadow); SD (semidarkness); S (snow); and O (obliquity).

The quality of the photography is categorized as G (good), F (fair), or P (poor).

The extent of photographic coverage is denoted by the symbols T (total), PT (partial), or ID (identification only).

The mode of coverage is indicated by ST (stereo), MN (mono), or PST (partial stereo).

When photographic scale and quality of image resolution permit, aircraft are identified by their NATO names, i.e., FAGOT, BADGER, BEAR, etc. In cases where identification by type cannot be made, aircraft are reported according to the classification shown in the table below.

Classification	Wing Span (ft)			Helicopter Rotor Diameter (ft)
	Straight	Swept	Delta	
Small	0-70	0-40*	0-35*	0-40
Light	71-110	41-70	36-50	41-60
Medium	111-150	71-130	51-70	61-100
Heavy	over 150	over 130	over 70	over 100

*In these two categories, fighter aircraft are further subdivided when possible: those in the size range of the FAGOT/FARMER are termed small; those larger are termed large.

For the convenience of the user, an index to all targets is included with targets arranged alphabetically within a country.
